

### Preparation for project public procurement

In November, 2024 the greatest attention was paid to the preparation of documents for the public procurement „Services for submission of digital exhibition ideas, preparation of exhibition installation projects and their implementation“ of the project **LL-00100 „Digital Craft Tourism“** (D-tour).

In order to prepare for the public procurement and to inform potential suppliers about the plans and requirements of this procurement, the draft technical specification has been published in advance in the Central Public Procurement Information System. Taking into account the comments received from the suppliers, the public procurement documents have been revised accordingly.

The public procurement „Services for submission of digital exhibition ideas, preparation of exhibition installation projects and their implementation“ is expected to be launched in the near future.

Project team members, while preparing for the process of creating digital exhibitions, are intensely interested in related innovations in Lithuania and abroad, participate in various events that talk about the impact of changes in the environment while promoting community, shaping people, their choices and habits.

The Interreg VI-A Latvia–Lithuania Programme 2021–2027 aims to contribute to the sustainable and cohesive socioeconomic development of the Programme regions by helping to make them more competitive and attractive for living, studying, working and visiting.
