Memorandums on energy efficiency signed with representatives of educational institutions in Panevėžys District Municipality

On August 24, 2026, meetings were held with the heads of Dembava Kindergarten “Smalsutis”, Dembava Progymnasium, and Pažagieniai School-Kindergarten. During the meetings, cooperation memorandums under the “Easy Energy” project were signed, aimed at improving energy efficiency. The memorandums express a commitment to promote the implementation of practical and cost-effective energy-saving solutions, share information and best practices, and contribute to strengthening the competencies of energy specialists.

This cooperation is being implemented within the framework of the project “Easy Energy – Simple Energy Efficiency Solutions for Public Buildings and Small Enterprises in the Baltic Sea Region.” The project aims to help public institutions and small businesses overcome barriers to improving energy efficiency and implement simple and accessible solutions.

During the meetings, Domas Jankevičius, “Easy Energy” Energy Saving Consultant and Chief Specialist of the Construction and Infrastructure Division, discussed with the heads of the institutions simple energy-efficiency measures that can improve the energy performance of buildings and reduce expenditure on heating, electricity, and water.

For more information on the project, visit the Easy energy website <https://interreg-baltic.eu/project/easy-energy/>.

The Easy Energy project co-funded by the Interreg Baltic Sea Region Programme 2021-2027 helps drive the Energy Transition.
