Working meeting of the “Easy Energy” project with representatives of educational institutions in the Panevėžys District Municipality

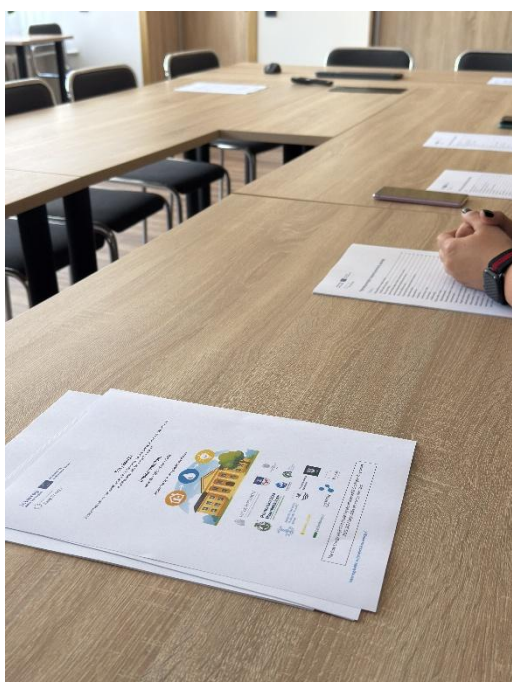

On 2 June 2026, a working meeting was held with representatives of educational institutions participating in the ‘Easy Energy’ project. During the meeting, the ‘Guide to Simple Energy-Saving Measures’, which was developed as part of the project and translated into Lithuanian, was presented. Domas Jankevičius, Senior Specialist in the Construction and Infrastructure Department and energy-saving consultant for the ‘Easy Energy’ project, presented energy-saving solutions relating to building insulation and energy efficiency, which reduce heating, electricity and water costs. All the solutions presented can be implemented as quickly as possible and without significant investment costs. They are also based on research carried out during the project, the results of completed pilot projects, and the assessments and experience of the project partners themselves.

For more information on the project, visit the Easy energy website <https://interreg-baltic.eu/project/easy-energy/>.
